

What's hot at UIP50 Monaco

By **J.J. Guex MD**, Chair Organizing Committee
and **E. Rabe MD, PhD**, Chair Scientific Committee

Controversies are HOT, no doubt that the different options with or without preservation of the saphenous trunks will lead to exchange of arguments...

UIP50 scientific committee can't promise you'll change your mind, but you'll have plenty of intellectual material to make a better choice.

Consensus are HOT, Phlebology curriculum does already exist in several countries, the UIP will provide with a comprehensive teaching corpus. Evaluation of outcomes is necessary to validate treatments, much progress has been done recently. New tools will be presented; refinement of existing scales will be debated.

The final program is now available on the website:

www.uip2009.eu

where you may also finalize your registration online.
